

MANTHAN THOOL

UI/UX Designer · Product Designer · Interaction Designer

Limerick, Ireland | manthanthool28@gmail.com | linkedin.com/in/manthanthool28

Profile

UI/UX and product designer with a **B.E. in Computer Engineering** and a recently completed **Master's in Interaction and Experience Design**. Experienced in designing responsive **web interfaces, user flows, prototypes, design systems, and visual assets in Figma**. Comfortable collaborating with **developers and cross-functional teams**, leading design work, and iterating from feedback. Master's thesis explored transforming familiar **2D sports data visualisations into interactive 3D experiences for non-expert users**. Background also includes hands-on work with Arduino, Pure Data, and Processing for physical computing, audio, and visual coding projects.

Core Skills

UX/Product: User-centred design, user flows, information architecture, wireframing, prototyping, usability testing, interaction design, responsive design, accessibility, design documentation.

UI/Visual: Visual hierarchy, typography, layout, design systems, component thinking, micro-interactions, high-fidelity interface design, visual communication.

Tools: Figma, FigJam, Framer, Adobe Premiere Pro, VS Code, Git/GitHub.

Technical: HTML, CSS, JavaScript, TypeScript, React, responsive frontend development, interactive prototyping, Three.js.

Physical Computing & Creative Coding: Arduino (sensors, actuators, microcontroller-based prototypes), Pure Data (audio programming, signal processing), Processing (visual coding, generative visuals, interactive installations).

Collaboration: Cross-functional collaboration, design critique, stakeholder communication, team leadership, mentoring, feedback-driven iteration.

Selected Projects

Interactive 3D Sports Data Visualisation — Master's Thesis

Investigated whether familiar 2D sports visualizations could be transformed into interactive 3D experiences for non-expert users. Explored spatial interaction, animation, viewpoint control, visual hierarchy, and the relationship between understanding and engagement. Used research, iterative prototyping, and user evaluation to examine the strengths and limitations of 2D and 3D representations.

Responsive Portfolio — React and Interactive Web Design

Designed and developed a responsive portfolio website presenting UX/UI, interaction design, visual communication, and creative technology projects. Structured case studies around the problem, process, design decisions, prototypes, and outcomes. Implemented interactive sections and responsive layouts for desktop and mobile, then deployed the site through GitHub Pages.

UX/UI Case Studies

Rag Picker App: Designed a mobile interface for an impact-driven service concept. Elderly Care Support App: Created accessibility-oriented UI concepts focused on clarity and ease of use. ShopEase: Designed an e-commerce experience covering product discovery and purchase flows. Laundry Xpress: Planned a service-booking experience with structured workflows and interaction states.

Experience

UI/UX Designer Team Lead — To-Let Globe, Lucknow, India

April 2024 – Present

Led a 22-member design team across interface design projects, reviews, delivery coordination, and quality standards. Translated requirements into user flows, wireframes, high-fidelity screens, prototypes, and reusable interface patterns.

Collaborated with developers, content writers, and UX contributors to clarify requirements and support implementation.

Reviewed design output and provided practical feedback on usability, visual hierarchy, consistency, and interaction quality.

Managed timelines and helped move projects from early concepts to delivery with limited supervision.

Mentored team members through design guidance, critique, and structured collaboration.

UI/UX Designer Intern — To-Let Globe, Lucknow, India

March 2024 – April 2024

Redesigned the company website in Figma with clearer information hierarchy, navigation, and responsive layout structure.

Created wireframes, mockups, interactive prototypes, and micro-interaction concepts for stakeholder review.

Iterated designs from feedback and prepared interface decisions for collaboration with developers and content teams.

Identified usability and visual-consistency issues early and proposed improvements during design reviews.

Education

Master's in Interaction and Experience Design

University of Limerick, Ireland · 2025 – 2026

B.E. Computer Engineering

All India Shri Shivaji Memorial Society's College of Engineering, Pune, India · 2022 · CGPA: 7.7

Awards

UL Hackathon — Special Designer Award and Second Place, 2025

IFP Design Hackathon — Top 20, 2024

Design Fusion Hackathon — Top 5, 2023

TuteDude Design Hackathon — Winner, 2022
